## PROFESSIONAL SUMMARY

Data and Risk Analytics professional with experience in developing Early Warning Systems, customer valuation frameworks, and portfolio risk strategies for large retail lending portfolios. Delivered measurable business impact through risk segmentation, delinquency analysis, and profitability modeling to support underwriting, collections, and pricing decisions. Strong hands-on expertise in SQL, Python, and PySpark with applied experience in predictive risk modeling and portfolio monitoring.

## KEY SKILLS

- **Statistical & ML Modeling:** Logistic Regression, XGBoost, Predictive Modeling, Feature Engineering
- **Analytics & Decision Science:** Credit Risk Analytics, Churn & Retention Modeling, Portfolio & Cohort Analysis, Customer Profitability & Valuation Framework, Risk-Based Pricing, Capital Allocation
- **Programming & Data:** SQL, Python, PySpark, SAS, Pandas, NumPy, AWS, Excel

## WORK EXPERIENCE

**Data Analyst, IDFC First Bank, Mumbai** 07/2023 – 10/2025

- Designed an **Early Warning System** using Logistic Regression to flag early risk exposures, enabling proactive collections prioritization and driving a **15% reduction in portfolio delinquency**.
- Architected a **Customer Lifetime Valuation (CLTV)** framework, reorienting retention and engagement toward the **top 16% value segment** and improving Customer Acquisition Cost efficiency.
- Built a DCF-based **valuation engine** for segment-level profitability assessment, enabling **risk-based pricing and capital allocation** and driving a **27 bps repricing** of Two-Wheeler loan yields.
- Streamlined securitization and refinancing eligibility logic and **automated risk reporting** (DPD, delinquency buckets, roll rates), reducing manual effort by **40 man-hours** per month.
- Partnered with risk, and business teams to translate analytical insights into actionable strategies.
- Automated **delinquency and cohort (vintage) analysis** to track portfolio performance and identify emerging risk trends, reducing manual effort by **60 man-hours** per month.
- Designed interactive decision-oriented profitability dashboards for senior stakeholders, enabling real-time segment comparisons and faster pricing and portfolio actions across lending verticals.

**Data Analyst Intern, IDFC First Bank, Mumbai** 07/2022 – 12/2022

- Supported risk monitoring and portfolio analytics across the lending portfolio.
- Assisted in performance tracking, portfolio monitoring, and analytical reporting.

## PROJECTS

- **YouTube Video Q&A Summarizer (RAG + LangChain + Streamlit)** – Built a RAG-based AI tool that summarizes YouTube videos and supports interactive question answering using LangChain pipelines, OpenAI GPT models, and a Streamlit-based web interface for interactive user queries.
- **Chatbot App (LangChain + Streamlit + OpenAI)** – Multi-threaded chatbot with persistent memory using LangGraph & SQLite; real-time GPT response streaming and context-aware chat retrieval.
- **Twitter Sentiment & Trend Analyzer** – Developed an NLP pipeline leveraging Tweepy and a pretrained RoBERTa model to analyze real-time Twitter sentiment and identify trending keywords.

## EDUCATION

**B.E. Electrical and Electronics Engineering | BITS Pilani (2019 – 2023)**

## ACHIEVEMENTS

**Certificate of Excellence — IDFC First Bank**
