PROFESSIONAL SUMMARY

Data and Analytics Engineer with 2+ years of experience building scalable data pipelines, automated analytics workflows, and portfolio monitoring systems in the banking and fintech domain at IDFC FIRST Bank. Skilled in SQL, Python, and PySpark for large-scale data processing, ETL automation, data transformation, and reporting systems. Experienced in designing production-grade analytics workflows supporting risk analytics, pricing strategy, profitability monitoring, and operational reporting across lending portfolios. Strong understanding of structured data processing, workflow optimization, and business-driven data systems.

KEY SKILLS

- **Data Engineering:** ETL Pipelines, Data Transformation, Batch Processing, Distributed Data Processing, Workflow Automation, Data Validation, Reporting Automation, Data Warehousing Concepts
- **Programming & Data:** SQL, Python, PySpark, SAS, Pandas, NumPy, AWS, Excel
- **Analytics:** Portfolio Analytics, Data Aggregation, Reporting Pipelines, SQL Query Optimization

WORK EXPERIENCE

Data Analyst, IDFC First Bank, Mumbai 07/2023 – 10/2025

- Architected a **Customer Lifetime Valuation (CLTV)** framework, reorienting retention and engagement toward the **top 16% value segment** and improving Customer Acquisition Cost efficiency.
- Built a DCF-based **valuation engine** for segment-level profitability assessment, enabling **risk-based pricing and capital allocation** and driving a **27 bps repricing** of Two-Wheeler loan yields.
- Built automated ETL and analytics pipelines using SQL, Python, and PySpark for delinquency tracking, DPD monitoring, roll-rate analysis, and cohort/vintage reporting across lending portfolios.
- Developed scalable data processing workflows and portfolio monitoring systems supporting risk analytics, pricing strategy, and profitability assessment for retail lending products.
- Automated operational reporting pipelines and recurring analytics workflows, reducing manual reporting effort by over **60 man-hours** per month.
- Designed and implemented data transformation workflows for securitization and refinancing eligibility analysis, improving operational efficiency and reducing manual effort by **40+ man-hours** monthly.
- Built reusable reporting layers and portfolio analytics pipelines enabling faster decision making.
- Collaborated with risk, collections, product, and business teams to convert operational requirements into scalable analytics and reporting solutions.

Data Analyst Intern, IDFC First Bank, Mumbai 07/2022 – 12/2022

- Supported lending analytics, and reporting automation initiatives across retail banking portfolios.
- Assisted in data extraction, data validation, reporting workflows, and portfolio performance monitoring processes.

PROJECTS

Banking Portfolio ETL & Analytics Pipeline

- Built an end-to-end ETL pipeline using Python and SQL for ingesting, transforming, validating, and analyzing lending portfolio datasets.
- Automated cohort analysis, delinquency monitoring, and portfolio reporting workflows for business performance tracking.
- Optimized transformation logic and reporting workflows to improve data consistency and reduce processing time.

Multi-Threaded AI Chatbot with Persistent Memory

- Built a context-aware AI chatbot using LangGraph, OpenAI APIs, and SQLite with persistent memory and multi-session conversation tracking.
- Implemented real-time response streaming and retrieval-based conversational memory for improved contextual interactions.

EDUCATION

B.E. Electrical and Electronics Engineering | BITS Pilani (2019 – 2023)
